IAPMO R&T Now Certifies High-Efficiency Toilets to EPA Specification

Ontario, CA (February 22, 2007) – IAPMO Research and Testing (R&T), a longtime leader in plumbing and mechanical product evaluation, announced recently that it has become an approved certification body for the Environmental Protection Agency’s (EPA) WaterSense program.

IAPMO R&T now certifies water closets to the Tank-Type High-Efficiency Toilet Specification as designated by the EPA program. Under the new specification, toilets must comply with a variety of requirements to be recognized as WaterSense-compliant. Manufacturers who meet or exceed program specifications will be able to display the WaterSense logo on qualifying products.

“WaterSense is an important EPA program, and we’re excited to be a part of it,” said Shahin Moinian, senior director of IAPMO R&T. “Manufacturers seeking WaterSense certification can utilize R&T for the same trusted evaluation service they’ve always relied on.”

Anish Desai, IAPMO R&T’s quality assurance manager agreed, adding, “Our certification speed and unparalleled customer service make IAPMO R&T the ideal choice for manufacturers seeking a competitive edge.”

For more information on certifying your high-efficiency toilet with IAPMO R&T, call (909) 472-4100 or visit www.iapmo.org.
